

STUDY BUDDIES NETWORK

The study buddies' network promotes **peer learning**, encouraging collaborative exploration of concepts and supporting slow learners.

Objectives:

1. To back slow learners with an academic support system.
2. To enhance the academic performance of advanced learners.
3. To foster collaborative learning.

“Study Buddies Network”

- This methodology involves advanced learners of a class to prepare answer bank for previous year University question papers with the help of the course instructors. This helps the advanced learners in improving their academic performance and reinforces their own understanding of the subject.
- This answer bank is then shared with the entire class which helps them to prepare for examinations.
- The students are then allowed to discuss their doubts with the advanced learners who have prepared the answer bank. The advanced learners then tutor their classmates which help to improve the overall results.

Note: Your valuable suggestions and Critique will help us to improve our teaching quality and offer the best learning environment. Write to us at
